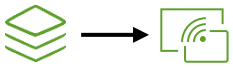
REPORTING CONDITIONS

The information on reporting supplements the STACKFORCE license conditions and primarily concerns the post-paid license model. If, in individual cases, it is not possible to allocate an address range for the pre-paid license models, the customer is also obliged to provide regular reporting on the devices that have been equipped with the licensed Protocol Stack. The report must be prepared quarterly by the customer and provided to STACKFORCE. The reporting process is basically the same for the pre-paid and post-paid models. Only the invoicing differs due to the different payment dates. The following section describes what is required for reporting.

THE REPORTING PROCESS

1 Integration



The customer integrates the purchased Protocol Stack into their devices.

(1 copy = 1 license)

2 Creation of the report

The customer creates a quarterly **report**[1] according to the specifications of STACKFORCE.

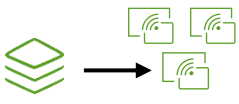
3 Submitting the report

The customer send their reports:

- unsolicited
- within 30 days at the end of each quarter of the year
- via email to sales@stackforce.de

PRE-PAID ROYALTIES

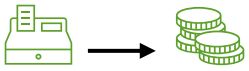
4 Optional: Increasing copies



If the reporting shows that the licenses have been used up and the number of copies purchased needs to be extended for further use of the Protocol Stack, a new order has to be placed and paid.

POST-PAID ROYALTIES

4 Invoicing



STACKFORCE **invoices** the royalties for the reporting period according to the relevant price per unit.

REQUIREMENTS FOR REPORTS[1]

1. Number of units produced and equipped with the licensed Protocol Stack during reporting period.

2. Attached list providing
   - the protocol specific address* and, unless identical,
   - the unique identifier (e. g. serial number) for each unit mentioned at Item 1.

*Examples for protocol specific addresses:

mioty®	EUI-64 Address
LoRaWAN®	EUI-64 Address
wM-Bus / OMS	2-Byte Manufacturer Address, 4-Byte Identification, 1-Byte Version, 1-Byte Type
Sigfox	4-Byte DeviceID

[1] STACKFORCE has the right to verify correctness of the reports at any time. STACKFORCE also has the right to hire a third-party service provider for this verification. Licensee is obliged to support STACKFORCE resp. a hired third-party service provider by providing the necessary access to accounting and production information.
